# Java Enterprise Edition

Fall Semester 2020

Instructor: Zhuanyshev Ilyas

TASK 8

Problem 1

Continue developing Internet Shop Application by using Spring Boot Framework. Use Thymeleaf framework as a front-view of your project. Re-style CSS design as shown in picture:

Problem 2

Use services for your business logic. Create **Repository** interface that extends **JpaRepository** interface to manage with database transactions. Create an Entity class for items.

Items.java

- Long id;

- String name;

- String description;

- double price;

- int stars;

- smallPicURL;

- largePicURL;

- Date addedDate;

- boolean inTopPage; // if true, then this item will be in top of index page

Functionalities:

    a. Add New Item
    b. List All Items
    c. List Only in top page
    d. Get One Item
    e. Edit Item
    f. Delete Item
